SPAWAR Systems Center San Diego Awards Contract

SAN DIEGO — Digital Wizards, Inc., of San Diego is being awarded a \$25,377,218 indefinite-delivery, indefinite-quantity, cost-reimbursement-type contract for the continued development of the Data Link Test Tools (DLTT) and Gateway Systems (GS). Both DLTT and GS are employed as the method to connect host/combat systems at remote labs to the Joint Tactical Information Distribution System and Multifunctional Information Distribution System terminals/terminal emulators to create a virtual network. The DLTT equipment and GS support the development, integration, and implementation of Tactical Digital Information Link (TADIL). The DLTT and GS are used to perform interoperability testing across numerous land-based test facilities including the Distributed Engineering Plant. The DLTT and GS also are employed in support of the following sites and systems: Joint Distributed Engineering Plant (JDEP); Command, Control, Communications, Computers, and Intelligence data links; Surveillance and Anti-Submarine Warfare systems; Theater Missile Defense System Exerciser; other non-Navy U.S. services; foreign governments; and North Atlantic Treaty Organization (NATO) forces involved with TADIL integration. The DLTT and GS allow interoperability testing using any combination of real and simulated combat systems and establishing virtual TADIL environments. This is a five-year contract with no options. The period of performance is from November 4, 2002 to November 3, 2007. All of the proposed work will be performed in San Diego. Contract funds will not expire at the end of the current fiscal year. This contract was competitively procured under solicitation N66001-02-R-5003 through the SPAWAR e-Commerce Central web site. The Space and Naval Warfare Systems Center San Diego is the contracting activity (N66001-03-D-5007).
